"97% of associations are using Microsoft products, yet are only utilizing 20% of the product's capability." - Sherman Crancer, Microsoft Senior Business Developer

To help bridge this gap, WSAE is partnering with Microsoft and Vorsite to provide technology presentations custom to the needs of association executives. Meet Aaron Nettles and learn how to leverage Office 365 for time saving and collaborating efficiencies. Aaron will be the voice and expertise for our webinar based monthly "Technology Tuesdays" that we look forward to launching May 9!

**THIS SESSION WILL COVER:**
- How Office 365 can reduce your need to send email attachments, make remote meetings more productive, and turn those old excel data files into a visual dashboard that helps you make better business decisions.
- Discover the full potential of Microsoft productivity solutions and see how they can help solve your business needs by encouraging collaboration and increasing accessibility to business intelligence data and insights.

**WHO SHOULD ATTEND:**
- Executives who have oversight responsibility and decision making on technology systems.
- Administrators who use these systems.

This seminar is eligible for 1 continuing education credits. WSAE is a Certified Association Executive (CAE) approved provider.

Cancellation policy: Requests for cancellations must be received 72 hours (3 business days) before event. If the request is received within the 72 hours, 100% of the registration fee will be refunded. Registration fees for cancellations received after 72 hours before the event or no-shows will be forfeited with no exceptions.
